

To our customers,

Busse has decided to temporarily suspend selling our line of Sterile Aspirating Tubing and Handle sets.

This will include our Catalog #'s 150, 151, 153, 1539 & 1540.

The reason for this suspension is that our tubing supplier has discontinued manufacturing this style tubing, without notice.

The request to place one last order in with them was denied.

Currently we are investigating other sources and are hoping to find an alternative shortly.

Since this process will take several months, we feel it best to exit the market until we resolve the situation.

When we are again able to ship these items, we will contact all our customers and let them know.

Please note that this will not affect our aspirating curette line. We will continue to supply our curettes.

We have listed companies below along with their part numbers that we know have comparable tubing and handle sets to our own:

Olympus Cat # 23116 with 3/8" x 6' tubing (Comparable to Busse Cat. # 153)
(<https://medical.olympusamerica.com/search/node>)

MedGyn Cat. # 022310 with 3/8" x 6' tubing (Comparable to Busse Cat. # 153) (www.medgyn.com)

MedGyn Cat. # 022312 with 1/2" x 6' tubing (Comparable to Busse Cat. # 150) (www.medgyn.com)

For the Busse Cat. # 151 the best thing to do is to purchase a comparable product to our catalog # 153 (listed above) and remove the adaptor by cutting it off

MD Aspiration tubing Cat. # LS 7010 (Comparable to Busse Cat. # 1539)
(<https://mfimedical.com/products/md-aspiration-tubing>)

Medline Cat. # DYND50110 (Comparable to Busse Cat. # 1540) (www.Medline.com)

We truly apologize for the inconvenience this will cause you but unfortunately, we were left no choice.
